

## imag Product: PLC LED lamp - G24

Product Model: imag-6W-G24-R-N6-2.1G

### Product description and application

The imag PLC LED lamp is made from good quality LEDs. It is up to 70% more efficient and the LEDs can last up to 5 times longer than conventional PLC CFL. It is built with Aluminum housing & PMMA optics lens.

### Benefits (compared to other PLC LED Lamp)

- 99.9% of LED lamp failure is due to LED driver. Replaceable LED driver solves 99.9% of LED lamp failure.
- The LED driver is fast to change (no more than 10 seconds).
- Easy for everyone to change the LED driver (including non-technical people like consumers).
- The long life span of LEDs (50, 000 hours) can be fully utilised.
- Distributors only need to keep stock of replaceable LED driver (same LED driver for 6W to 7W LED lamp).
- The LED lamp can be upgraded (dimming or other functions) simply by changing the LED driver.

<b>6 W</b>	<b>50,000</b> hours lifespan	<b>HIGH</b> <b>POWER</b> LEDs

Replaceable LED Driver		

### Benefits (Compare to traditional PLC)

- Reduce energy consumption
- Less maintenance required
- Instant brightness
- No flicker
- Can use existing fixture
- Simple installation

### Features

- High efficacy
- Long life span
- Universal voltage inputs
- No-flicker start
- High luminous output

### Application

- General lighting
- Office lighting
- Shop lighting
- Corridor lighting
- House lighting

### Suitable Lampsockets

Our G24 lamp base also fits for below traditional lamp sockets
