

Motion Sensor MS360 Specification & Instruction

General Information

Power: Less than 0.01W
Current: Max 0.5mA
Voltage: 5V
Sensing Distance: Up to 8M
Sensing Angle: 360 degree
Connecting Port: Mini USB

Packing

Product Weight: 50g
Numbers/Carton: 100units
Gross Weight: 5.3kg
Carton Size (L×W×H): 68*38*34cm

Options

Sensitivity Adjustable
Time Delay Adjustable: 20s-10Min
Brightness Adjustable: 3 levels of brightness setting. Brightness depends on the LED driver.
(Standard LED driver setting is O(0%), I(30%), and II(70%) brightness.)

Instructions

1. Connect the sensor with 5G T8 LED Tube by mini USB cable provided.
2. Fix the sensor by clipping on the led tube, or stick onto any flat surface without the clip.
3. Select the sensitivity.
4. Select the lighting time delay.
5. Select a brightness grade.
6. Turn on the power and test whether the motion sensor is working.
7. Adjust the sensitivity, time delay and brightness according to needs.

Material

Housing Material: ABS
Housing Color: White

Accessories

Mini USB cable
Circular Clip (detachable)
